Friday Update May 20, 2005

Clarification on Elimination of July 1, 2006 Deadline

As reported in the past Friday Update, the Board has approved a recommendation to eliminate the July 1, 2006, deadline for additions to licenses under previous rules and for professionalization for licenses under previous rules. I would like to offer two points of clarification. They include:

- 1) This recommendation applies **ONLY** to additions to licenses and professionalization of licenses. After July 1, 2006, all **ORIGINAL** licensing requests must be issued under Rules 2002.
- 2) The rule (515 IAC 9) must still be repromulgated before this becomes official. This will take at least six months. However, the only way that people would be effected is if the rule is not promulgated by July 1, 2006, which is extremely unlikely.

Please let us know if you have any additional questions on this issue.
